## USGA Greens Guide

compliments of -

| Particle Size Distribution of a USGA Rootzone Mix |  |  |
| :--- | :---: | :---: |
| Fraction Size <br> Name | Sieve Size <br> US Standard (mm) | Acceptable Range <br> \% Retained |
| Gravel | $10(2.00)$ | $\leq 3 \%$ |
| Very Coarse | $18(1.00)$ | $\leq 7 \%$ to $10 \%$ |
| Coarse | $35(0.50)$ | At least $60 \%$ <br> in this range. |
| Medium | $60(0.25)$ |  |
| Fine | $100(0.15)$ | $20 \%$ Maximum |
| Very Fine | $270(0.05)$ | $5 \%$ Maximum |
| Silt | 0.002 | $5 \%$ Maximum |
| Clay | $<0.002$ | $3 \%$ Maximum |
| Uniformity <br> Coefficient | $1.8-3.5$ <br> for mixes with peat | $2.0-3.5$ for sand <br> or inorganic mixes |

This information was compiled from the 2018 revision of the USGA Recommendations for a Method of Putting Green Construction, which can be found on the internet at www.usga.org.

## Turf \& Soil

 Diagnostics| Physical Performance of a <br> USGA Rootzone Mix |  |
| :--- | :---: |
| Test | Allowable <br> Ranges |
| Infiltration Rate | Minimum <br> 6 inches/hour |
| Total Porosity | $35-55 \%$ |
| Capillary Porosity | $15-25 \%$ |
| Noncapillary Porosity | $15-30 \%$ |

Regardless of the amendment choice, the rootzone mix must meet the physical properties requirements as defined in the USGA Recommendations.

## Amendment Selection

| Type | Requirement |
| :--- | :---: |
| Organic | Peat: $>85 \%$ organic matter by dry wt. <br> Compost: must be in mesophilic stage. |
| Inorganic | Porous inorganic amendments only |
| Soil | $>60 \%$ Sand and $5-20 \%$ Clay. |

## USGA Recommendations for a Method of Putting Green Construction

- Rootzone: uniform depth of 12 "
- Intermediate Layer (if needed): 2 to 4" depth
- Gravel Layer: 4" depth
- A subsurface drainage system is required.
- Sub grade: should conform to the general slope of the finished grade

See other side of this document for USGA rootzone mix recommendations.

| Gravel Criteria of USGA Green Design <br> (Without an Intermediate Sand Layer) |  |
| :--- | :---: |
| Sieve Size <br> US Standard (mm) | Allowable Ranges |
| $1 / 2^{\prime \prime}(12.5)$ | $100 \%$ Passing |
| $\# 10(2.0)$ | $\leq 10 \%$ Passing |
| $\# 18(1.0)$ | D15 Gravel $\leq 8 \times 5 \%$ Passing |
| Uniformity Coefficient | $\leq 3.0$ |
| Bridging | D15 Gravel $\geq 5 \times$ D15 Sand |
| Permeability | Microdeval testing may be required if stability is <br> questionable. |
